Projects

Pizza Order System (Laravel)

This is my class project. It is a realworld POS project but I craft this with my teacher guide line but I add alot of feactures. This project is exam project for my laravel class. I passed tasks and I got certificate.

[CLICK HERE](#)

E Book Project (Laravel)

- This is my class **second mini project**. This project can login and register. This method is using **Laravel Jetstream**. Project have two Panel ,they are Admin and User Panel.
- If you login Admin account you will reach Admin Panel and if you login user account you will reach User Panel. eg. Admin (email – admin@gmail.com, password – admin123) or User (need to create account).
- **Admin** can create, edit, and delete categories and books. But Books download link is need to first upload in other cloud server, after can put link here.
- **Admin** can Manage Role other account Admin to User (or) User to Admin. But can't change role him account.
- **Admin** can Manage him Profile details and change password.
- **Admin** can changes account password.
- **User** can filter category and search books.
- **User** can read description and download PDF file book.
- **User** can manage Profile and changes password.
